

BALEWRAPPER X2

TLR 5000 Automatic Round Bale Wrapper

WRAPPING ROUNDED UP

Round Bale Productivity Just Multiplied

Tube-Line proudly introduces the TLR 5000 Automatic Balewrapper. The TLR 5000 Automatic carries all the great features of the X2 line-up but simplified for the dedicated round hay bale user.

Standard Equipment:

- Guide Rollers
- Traction Implement Tires
- Quick Start Deck Adjust

BALEWRAPPER X2

Production & Value Wrapped Up

The new Tube-Line Balewrapper X2 TLR 5000 Automatic, focuses on round bales and operators needs. This round bale only wrapper has been refined resulting in a lighter, more maneuverable machine. These standard features give you more control and easier operation. Operating controls are positioned above the engine for ease of use and "heads up" usability. Included Guide Rollers ensure performance even on uneven ground. Standard Traction implement tires give the TLR 5000 sure footed long life performance.

Quick Start Deck Adjust

Setting up and Starting a row is easier than ever. The Quick Start Deck raises and lowers on the hydraulic rear axles, eliminating the need for an extra beaver tail. This new design also reduces the overall deck height making loading quicker. Once lowered the deck also provides the braking needed to ensure a tight pack.

Specifications

Overall Length	18'
Width	9'
Height	9'
Weight	5,000 lbs.
Tires	(2) 11L x 15 8ply (2) 27 x 10.5 Traction Implement
