TECHNO-BALE *Less Machinery, More Efficiency.*

Tube-Line introduces one of the safest, fastest and easiest ways to move round bales from the field. All that, and less compaction too.

You can adjust everything from the arm to the racks on the **Tube-Line Techno-Bale**

Easily stack bales

Better rear view with low profile design

Quickly unload bales in a row

The **Techno-Bale's** fully adjustable arm is designed to give the bale a spin before picking it up, so you can follow the path of the baler without time-consuming and damaging cross-tracking. You can adjust everything from the arm to the racks on the **Techno-Bale** to fit your preferred bale size, from 4x4 to 6x5, for safe and simple operation. The convenient hydraulics are designed to work with most tractors' available hydraulics, moving from the loading cycle to the unloading cycle with the flip of a switch.

Both models let you stack bales for storage or line them up in rows ready for wrapping. The 900 allows you to pick up 3 to 5 bales and easily transport them from the field. The 900 also has built in counterweight mounts for even more stability. The 960 model lets you pick up 8 or 9 bales wet or dry, then stack or unload them two wide.

The **Techno-Bale's** exclusive low-profile design not only makes it easier to see the road behind the wagon, but also keeps the loading arm in full view of the operator throughout the loading cycle. This makes the **Techno-Bale** easy to use, productive and fast.

Bale sizes: **Model 900**

Shown with removable stacking forks

Bale sizes: **Model 960**

SPECIFICATIONS

Remote Outlets Required.....	2
Horsepower Requirement	35HP min
Tires	11Lx15
Shipping Width	7'10"
Operating Width	7'10"
Weight	3000 lb
Bale Size	4x4 to 6x5

SPECIFICATIONS

Remote Outlets Required.....	2
Horsepower Requirement	60HP min
Tires	12.5x15
Shipping Width	9'8"
Operating Width	10'5"
Weight	4735 lb
Bale Size	4x4 to 5x5
